

Introducing the New Automatic Spa Unit

Securing Spas at the Touch of a Button

Are your customers looking for a **luxurious**, **safe**, and **convenient** addition to your new pool and spa build? With our new automatic spa cover, easily open and close a spa with the push of a button for maximum energy efficiency, safety, and protection.

The benefits of an automatic spa cover are endless.

- » **Safety:** Our spa covers are made of the same durable, weight-bearing vinyl that our pool covers are made with, offering peace of mind to pool and spa owners, and ensuring the safety of loved ones.
- » **Energy Efficiency:** Auto-covers help decrease energy and chemical consumption while keeping heat in.
- » **Cleanliness & Maintenance:** An automatic spa cover acts as a barrier, preventing debris from entering your spa when it's not in use.
- » **Convenience:** With the push of a button, your customers can effortlessly cover or uncover their spa, eliminating the hassle of bulky and heavy traditional hot tub covers.
- » **Aesthetics:** With an automatic spa cover, your customers are able to match the color of their spa to their automatic pool cover, blending in their spa seamlessly with its surrounding landscaping. The sleek and symmetrical appearance of the new Spa Unit from APC makes it the perfect choice for those looking for a beautiful backyard.
